PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

1. Nature of and continuing operations:

Photon Control Inc. (the Company) is incorporated under the laws of British Columbia. The Company commercializes and develops innovative measurement technologies specializing in Oil & Gas, Semiconductor, Power, Life Sciences and Manufacturing industries worldwide. On August 17, 2000, the Company completed an initial public offering of its common shares, which are listed on the TSX Venture Stock Exchange under the trading symbol PHO. In 2002, the Company changed its name from Coldswitch Technologies Inc. to Photon Control Inc.

2. Significant accounting policies:

(a) Basis of presentation:

These interim consolidated financial statements of the Company were prepared in accordance with IFRS, as issued by the IASB. As these financial statements represent the Company's initial presentation of its results and financial position under IFRS, they were prepared in accordance with IAS 34, Interim Financial Reporting and by IFRS 1, First-time adoption of IFRS. These interim financial statements have been prepared in accordance with the accounting policies the Company expects to adopt in its December 31, 2011 financial statements. Those accounting policies are based on the IFRS standards and the International Financial Reporting Interpretations Committee ("IFRIC") interpretations that the Company expects to be applicable at that time. The policies set out below were consistently applied to all the periods presented.

The Company's consolidated financial statements were previously prepared in accordance with Canadian GAAP. Canadian GAAP differs in some areas from IFRS. In preparing these interim financial statements, management has amended certain accounting and valuation methods previously applied in the Canadian GAAP financial statements to comply with IFRS. The comparative figures for 2010 were restated to reflect these adjustments. Certain information and footnote disclosures which are considered material to the understanding of the Company's interim financial statements and which are normally included in annual financial statements prepared in accordance with IFRS are provided in NOTE along with reconciliations and descriptions of the effect of the transition from Canadian GAAP to IFRS on equity and earnings.

These financial statements were prepared on a going concern basis, under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, and financial assets and financial liabilities at fair value through profit and loss. These financial statements consolidate the accounts of the Company and its subsidiary companies. These subsidiary companies are inactive and all material intercompany balances and transactions have been eliminated.

The preparation of financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 2.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

(b) Cash and cash equivalents:

Cash and cash equivalents consist of highly liquid investments that are readily convertible to known amounts of cash. Short-term investments have maturity dates of three months or less from the date of purchase, or they are redeemable prior to maturity.

(c) Use of estimates:

The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements and the reported revenue and expenses during the years. Significant items subject to such estimates and assumptions include the recoverable amount of equipment, deferred development costs and intangible assets, and valuation allowances for receivables and inventory and assumptions used in determining the fair value of options and warrants.

These financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the framework of the significant accounting policies summarized below.

(d) Inventory:

Inventory consists of optical, mechanical and electronic components and finished goods and is valued at the lower of cost or net realizable value. Cost is determined on a first in first out basis, and includes the cost of direct material, direct labour and other overhead costs. Labour costs are allocated to items based on actual labour rates. Fixed and variable overhead are allocated to production activities in converting materials to finished goods.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

2. Significant accounting policies (continued):

(e) Property and equipment:

Property and equipment are stated at cost. Amortization is provided on the declining balance basis at the following annual rates:

Asset	Rate 2010
Lab equipment	20%
Computers, office furniture and equipment	20%
Computer software	100%
Production equipment	30%
Leasehold improvements	Over the lesser of the initial term of the lease and the useful life of assets

(f) Intangible assets:

The costs of acquiring intangible assets, consisting of licenses, patents and trademarks are capitalized. Costs are amortized over the lesser of the estimated useful life of the intangible asset or the license term.

(g) Revenue recognition:

Revenue from sales of products is recognized when goods are shipped and title passes, there is persuasive evidence of an arrangement, collection is probable and fees are fixed and determinable. Cash collected prior to revenue recognition criteria being met is recorded as deferred revenue on the consolidated balance sheet.

(h) Research and development costs:

Research costs are expensed as incurred. Development costs are expensed as incurred unless they meet the required criteria for deferral and amortization. The Company deferred no further development costs in 2010 or 2011 (2009 - \$nil) relating to development of a portable sulphur analyzer product. The Company amortizes previously deferred development costs, commencing with commercial production, over the expected future benefit period based upon quantities delivered compared to expected levels contracted to be delivered. The amount amortized in current fiscal 2011 was nil (2010 - \$37,214). The Company has a balance of deferred development expenses as at March 31, 2011 of \$152,724 (March 31, 2010 - \$189,938).

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

2. Significant accounting policies (continued):

(i) Government assistance:

The Company makes periodic applications for financial assistance under available government incentive programs. Government assistance relating to capital expenditures is reflected as a reduction of the cost of such assets, while government assistance relating to current expenses is recorded as a reduction of such expenses. The benefits of government assistance are recognized when there is reasonable assurance that they will be realized. Reasonable assurance is considered to have occurred when the relevant authorities have indicated that the Company's research and development activities qualify for government assistance. The Company received no government assistance during the year ended December 31, 2010 nor Q1 2011.

(j) Earnings (loss) per share:

Basic earnings (loss) per share amounts are calculated by dividing net earnings (loss) by the weighted average number of common shares outstanding during the year. Diluted earnings per share amounts are computed similarly to basic earnings per share except that the weighted average shares outstanding are increased to include additional shares from the assumed exercise of additional options and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from such exercises were used to acquire shares of common stock at the average market price during the year.

(k) Income taxes:

The Company uses the asset and liability method of accounting for income taxes. Under this method, future income tax assets and liabilities are recognized for the future income tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases (temporary differences), and losses carried forward. The resulting future tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on future income tax assets and liabilities of a change in tax rates is recognized in income in the period in which the change in tax rate is substantively enacted. Future income tax assets are evaluated and, if realization is not considered "more likely than not", a valuation allowance is provided.

(l) Share issue costs:

The costs of issuing common shares are applied to reduce the stated value of such shares.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

2. Significant accounting policies (continued):

(m) Translation of foreign currencies:

Monetary items denominated in foreign currencies are translated to Canadian dollars at exchange rates in effect at the balance sheet dates and non-monetary items are translated at rates of exchange in effect when the assets were acquired or obligations incurred. Revenue and expenses are translated at rates in effect at the time of the transactions. Foreign exchange gains and losses are included in earnings.

(n) Stock-based compensation plans:

The Company has a stock-based compensation plan, which is described in Note 7(d). The Company accounts for employee stock options using the fair value based method. Under the fair value based method, compensation cost attributable to options granted to employees and directors is measured at the fair value at the grant date using the Black-Scholes option pricing model. Compensation expense is recognized over the vesting period of the underlying option. Any consideration paid by employees on exercise of stock options or purchase of stock is credited to share capital. No compensation cost is recognized for options that employees forfeit if they fail to satisfy the service requirement for vesting. Compensation expense is recognized for stock-based payments to non-employees using the fair value based method.

(o) Warranty provision estimate:

The company accrues for the estimated obligation under warranty provisions at the time sales are recognized and any changes in estimates are recognized prospectively.

(p) Financial Instruments:

The Company has classified its financial instruments as follows:

- Cash and cash equivalents and bank indebtedness, if any, as "held-for-trading".
- Trade accounts receivable, the note receivable and amounts due from related parties are classified as "loans and receivables".
- Accounts payable and accrued liabilities, amounts due to related parties and advances under credit facility are classified as "other financial liabilities".

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

2. Significant accounting policies (continued):

All financial instruments are initially recognized at fair value and are subsequently accounted for based on their classification. The fair value of a financial instrument on initial recognition is the transaction price, which is the fair value of the consideration given or received. Subsequent to initial recognition, financial assets and liabilities classified as held-for-trading are measured at fair value with changes in fair value recorded in the Consolidated Statements of Operations. Financial assets classified as "loans and receivables" and "other financial liabilities" are carried at amortized cost using the effective interest rate method. The fair values are based on quoted market bid process if available, otherwise fair value is obtained using discounted cash flow analysis. Transaction costs that are directly attributable to the issuance of financial assets or liabilities are accounted for as part of the carrying value at inception, and are recognized over the term of the assets or liabilities using the effective interest method.

(q) Impairment of property, equipment, intangibles and deferred development costs:

The Company determines if any impairment exists when events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. An impairment loss is then required if the carrying amount of a long-lived asset exceeds the sum of the undiscounted cash flows expected to result from its use and eventual disposition. The amount of loss is measured as the amount by which the long-lived asset's carrying value exceeds its fair value.

(r) Comparative figures:

Certain comparative figures have been reclassified to conform with the IFRS financial statement presentation adopted in the current year.

3. Changes in accounting policies:

(a) Adoption of International Financial Reporting Standards

The CICA's Accounting Standards Board announced that Canadian publicly accountable enterprises will adopt IFRS as issued by the International Accounting Standards Board effective January 1, 2011. The company's financial statements are now presented in accordance with IFRS. Subsequent reviews will ensure that the company will be 100% compliant by December 31, 2011. See also Note 8.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

7. Share capital (continued):

(c) Stock options:

The number of options reserved for issuance under the Company's stock option plan is equal to 10% of the issued and outstanding shares in the Company. Accordingly, as at December 31, 2010, the Company's board of directors had reserved 10,290,952 (2009 - 10,135,202) options for issuance under the Company's stock option plan. The plan provides that options may be granted with an exercise price of no less than the market price of the Company's stock on the grant date less applicable discounts permitted by the TSX-V. The plan also provides that the term of the options shall not exceed five years.

Stock option transactions are summarized as follows:

	Number of shares	Weighted average exercise price
Outstanding, December 31, 2009	5,713,750	\$ 0.25
Granted	140,000	0.10
Cancelled	(820,000)	0.43
Expired	(703,750)	0.36
Outstanding, December 31, 2010	4,330,000	\$ 0.19
Granted	2,830,000	0.10
Cancelled	(846,250)	0.19
Expired	(1,563,750)	0.18
Exercised	(157,500)	0.10
Outstanding, December 31, 2010	4,592,500	\$ 0.10
Granted		0.00
Cancelled		0.00
Expired	(20,000)	0.10
Exercised		0.00
Outstanding, March 31, 2011	4,572,500	\$ 0.10

Nil stock options were granted during the three months ended March 31, 2011 (2010 - 1,445,000).

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

7. Share capital (continued):

(c) Stock options (continued):

The following table summarizes the stock options outstanding at March 31, 2011:

	Options outstanding			Options exercisable	
	Number of shares	Weighted average remaining contractual life (years)	Weighted average exercise price	Number of options exercisable	Weighted average exercise price
Exercise price					
\$0.10	4,572,500	3.04	\$ 0.100	2,403,750	\$ 0.100
\$0.105	10,000	4.53	\$ 0.105	2,500	\$ 0.105
\$0.11	10,000	4.43	\$ 0.110	2,500	\$ 0.110
	4,572,500	3.14	\$ 0.100	2,408,750	\$ 0.100

The options outstanding at December 31, 2010 expire between July 17, 2011 and December 21, 2014.

The fair value of options granted was estimated on the date of the grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	2010	2009
Expected option lives	5 years	5 years
Risk-free interest rate	2.33%	2.65%
Dividend yield	0%	0%
Volatility	219%	124%

During the three months ended March 31, 2011, the Company recorded \$22,812 (2010 - \$24,223) of compensation expense representing the fair value of the options and shares vesting during the year with a corresponding increase to contributed surplus.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

7. Share capital (continued):

(d) Warrants:

There was no warrant activity nor warrants outstanding during the three months ended March 31, 2011. Information related to the Company's share purchase warrant activity for the year ended December 31, 2009 is as follows:

Expiry dates	Exercise price	Balance, December 31, 2008	Issued	Exercised	Expired	Balance, December 31, 2009 and 2010
August 15, 2009	\$ 0.21	1,454,350	-	-	1,454,350	-
February 15, 2009	\$ 0.15 ⁽ⁱ⁾	232,695	-	-	232,695	-
		1,687,045	-	-	1,687,045	-

⁽ⁱ⁾ These are agents' options to purchase units, which are issued as commissions with respect to private placements. Each unit consists of one common share and one half of one common share purchase warrant.

(e) Net earnings (loss) per share:

The weighted average number of shares outstanding as at March 31, 2011 of 102,337,056 (March 31, 2010 - 101,352,018) was used in the calculation of basic earnings per share and 106,651,719 (March 31, 2010 - 106,024,206) was used in the calculation of diluted earnings per share. Exercise of all of the stock options and share purchase warrants referred to in Notes 7(c) and 7(d) are anti-dilutive for all years presented.

8. Explanation of Transition to IFRS:

The Company's financial statements for the year ending December 31, 2011 will be the first annual financial statements that comply with IFRS and these interim financial statements were prepared as described in note 1, including the application of IFRS 1. IFRS 1 requires an entity to adopt IFRS in its first annual financial statements prepared under IFRS by making an explicit and unreserved statement in those financial statements of compliance with IFRS. The Company will make this statement when it issues its 2011 annual financial statements.

IFRS 1 also requires that comparative financial information be provided. As a result, the first date at which the Company has applied IFRS was January 1, 2010 (the "Transition Date"). IFRS 1 requires first-time adopters to retrospectively apply all effective IFRS standards as of the reporting date, which for the Company will be December 31, 2011. However, it also provides for certain optional exemptions and certain mandatory exceptions for first-time IFRS adopters.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

8. Explanation of Transition to IFRS (continued):

Initial elections upon adoption

Set forth below are the IFRS 1 applicable exemptions and exceptions applied in the conversion from Canadian GAAP to IFRS.

IFRS Exemption Options

(i) Property Plant, and Equipment – IAS 16 provides the option for an entity to use the cost model for the valuation of property, plant, and equipment, of the revaluation model. The revaluation model requires the restatement of property, plant and equipment to fair market values on an annual basis. Given the existence of equipment only, the Company has elected to use the cost model for valuation.

Presentation Reclassifications

Statement of Operations:

1. RECLASSIFICATION OF AMORTIZATION AND DEPRECIATION

Canadian GAAP – Amortization and depreciation presented separately on the face of the income statement.

IFRS – Amortization and depreciation to be included in each “Function” when using the “cost of sales” method.

2. RECLASSIFICATION OF WARRANTY EXPENSE

Canadian GAAP – The transaction for a sale is netted of any trade or volume discounts, returns and allowances, claims for damaged goods and certain taxes.

IFRS - Revenue is netted of items as in GAAP as well as estimates for warranty claims

Balance Sheet:

No adjustments were required to convert Canadian GAAP to IFRS.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

9. Related party balances and transactions:

All transactions with related parties have been translated in the normal course of operations and have been measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties. Related party transactions include transactions with Photon Control R&D Ltd. Photon Control R&D Ltd. commenced providing engineering consulting and research and development services to the Company on October 1, 2008 and, as a result, the Company has reduced its internal research and development operations. The Company subleases space to Photon Control R&D Ltd. at the same facility. The Company charges Photon Control R&D Ltd. premises and related expenses to recover the Company's costs. Amounts outstanding with Photon Control R&D Ltd. are non-interest bearing, unsecured and due on demand.

As at March 31	2011	2010
Balance Sheet		
Accounts receivable	\$ 937,299	\$ 810,676
Note receivable	191,637	219,541

Engineering, research and development services expenses	127,259	138,849
Royalties	47,863	23,235
Revenue from sales of products and services	65,412	187,490

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

9. Related party balances and transactions (continued):

The Company indemnifies its directors and officers against any and all claims or losses reasonably incurred in the performance of their service to the Company to the extent permitted by law. The Company has acquired and maintains liability insurance for directors and officers of the Company.

During 2009, the Company finalized and amended the terms of its agreement to transfer its R&D workforce to Photon Control R&D Ltd. Under the finalized terms, Photon Control R&D Ltd. issued a \$315,000 promissory note to the Company as consideration for the transfer. The promissory note bears a coupon rate of 3% per annum, is repayable in equal monthly instalments of \$3,089 beginning April 1, 2010 and matures March 1, 2020. For accounting purposes, the transaction was recognized at the exchange amount and the promissory note was discounted at an estimated market rate of 10% resulting in a carrying value of the note receivable at issuance of \$217,487 and a deferred gain. The deferred gain of \$24,668 is recognized in income as principal payments on the note receivable are collected by the Company. The promissory note receivable is being accreted up to its face value of \$315,000 by the effective interest method and as at March 31, 2011, \$4,184 (2010 - \$2,054) in accretion was recognized in interest income.

As at March 31	2011	2010
Promissory note receivable – face value	\$315,000	\$ 315,000
Less: discount	(97,513)	(97,513)
	217,487	217,487
Accretion	4,184	2,054
Principal repayment	(30,034)	-
Carrying amount	191,637	219,541
Current portion	(29,600)	(24,668)
Long-term portion	\$162,037	\$ 194,873

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

10. Commitments and contingencies:

(a) Leases:

The Company has entered into premises leases requiring the following minimum lease payments as follows:

2011 (as of May 31)	\$ 504,800
2012	216,443
	<hr/>
	\$ 721,243

The above lease commitment amounts are prior to rental expense recoveries of \$17,805 per annum for 2011 and \$nil in 2012 in relation to sub-lease agreements executed in 2006 and 2007.

(b) Litigation:

(a) In October 2001, a former member of management and director of the Company (the Claimant) initiated arbitration asserting that certain amounts were owing to him by the Company. The Company denies that it owes these amounts.

In addition, the Claimant has filed a claim against the Company seeking unquantified damages for wrongful dismissal. The Company considers the allegations in the lawsuit to be without merit and intends to defend the action. The Company has also filed a counterclaim.

The Company's application to dismiss the claim was denied in September 2009. Subsequently, the trial commenced on May 9, 2011 but did not complete on May 20, 2011 as scheduled. Trial will resume on June 13 to 15, 2011 and it is hoped that it will be completed by June 15, 2011.

It is not possible to determine the likely outcome of these litigation matters, nor is it possible to determine the nature and amount of consideration, if any, which the Company may have to pay or which it may collect as a result of these proceedings. Provision of \$310,499 (2009 - \$310,499) has been made in the accounts of the Company for these actions.

(b) In September 2010, the Company filed a lawsuit in the United States, against Azbil North America, Inc. for damages for breach of contract, including breach of confidentiality, non-disclosure and non-disparagement obligations, unfair completion, misappropriation of trade secrets and tortious interference with prospective economic advantage and for an injunction against Azbil to preclude the continued disclosure of confidential information, technology and trade secrets.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

10. Commitments and Contingencies (continued):

In September 2010, the Company filed a lawsuit in the United States, against Yamatake Corp. for misappropriation of trade secrets and injunctive relief to prevent Yamatake from further dissemination and publication of our trade secrets and confidential information.

Subsequently, as announced in the News Release dated May 24, 2011, the Company resolved its disputes with Azbil and Yamatake and both litigations have been dismissed without prejudice. The parties have agreed to continue their working relationship and have entered into a new agreement with the expectation that all parties involved will benefit from continued cooperation in the development and supply of fiber optic temperature sensors to their customers throughout the world. The Company will continue to provide products and technical support and assistance in the area of optical temperature sensors to both Azbil and its customers. Moreover, the parties have agreed to work together to develop and protect their intellectual property in the area of optical temperature sensors.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

12. Financial instruments:

Fair Value of Financial Assets and Liabilities:

The Company has no financial instruments recorded fair value at December 31, 2010 and 2009.

The note receivable from related party is measured at amortized cost. Its market value was determined at inception based upon discounting contractual cash flows at estimated market discount rates considering the credit risk of the counterparty. The estimated market value as at December 31, 2010 is estimated to approximate its carrying value.

The fair value of the Company's cash and cash equivalents, trade accounts receivable and other amounts due under credit facility, amounts due to and from related parties, accounts payable and accrued liabilities approximate their respective carrying amounts due to their short maturities or are discounted at market interest rates.

Risk Management:

(a) Credit and interest rate risk:

The Company is exposed to credit risk associated with its trade accounts receivable and related party receivables. Credit risk is minimized substantially by ensuring the credit worthiness of the entities with which it carries on business. In November 2009, the Company entered into an agreement with Export Development Canada to insure its non-Canadian accounts receivable. As at December 31, 2010 the maximum credit risk, which is the total of its uninsured trade receivables, was \$687,235 or 29% (2009 - \$5,965 or 4%) of the total outstanding accounts receivable balances as of December 31, 2010.

The following table provides information regarding the aging of trade receivables as at March 31, 2011:

Current	31-60 days	61-90 days	91 days +
73%	5%	4%	18%

The following table provides information regarding the aging of trade receivables as at March 31, 2010

Current	31-60 days	61-90 days	91 days +
48%	38%	3%	18%

The Company holds its cash and cash equivalents at a major Canadian banking institution. As at March 31, 2011, the Company was not exposed to significant credit or interest rate risk.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

12. Financial instruments (continued):

(b) Market, interest and foreign exchange risk:

Market risk is the risk that changes in market prices such as foreign exchange rates and interest rates will affect the Company's net earnings or the values of financial instruments. The Company is exposed to interest rate risk with regard to the cash, cash equivalents and amounts due under credit facility and its related party note receivable. The majority of the Company's sales revenues and trade receivables are denominated in United States dollars. As such, the Company's may be subject to, material, realized and unrealized exchange gains or losses resulting from above average changes in exchange rates between the Canadian and United States dollar. As at December 31, 2010, the Company did not utilize any forward exchange contracts to mitigate any of the risks as mentioned above. The following table lists the United States dollar balances of monetary items denominated in US dollars as at December 31, 2010:

Amounts denominated in US dollars	March 31, 2011	2010
Cash	\$ 933,898	\$ 54,499
Trade accounts receivable	2,192,085	1,991,944
Trade accounts payable	333,653	500,405

The estimated impact on net earnings at at March 31, 2011 with a +/- 10% change in foreign exchange rates is \$279,233 (2010 - \$154,604).

The above sensitivity demonstrates the effect of a change in foreign exchange rates in isolation. In reality, there may be other contributing factors that will materially alter the estimated outcome. Furthermore, the financial position of the Company may vary at the time that a change in foreign currency exchange rates occurs, again, causing the impact on the Company's results to differ materially from the estimated outcome shown above.

(c) Liquidity risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The ability to do this relies on the Company being able to successfully rely on external financing as well as the timely collection of its outstanding trade accounts receivable. As at March 31, 2011, the Company's accounts payable and accrued liabilities were \$1,547,362 (2010 - \$1,626,085) which fall due for payment within twelve months of the balance sheet date. As at March 31, 2011, the Company had an unutilized credit facility of \$500,000 (fully utilized as at March 31, 2010).

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

12. Financial instruments (continued):

(c) Liquidity risk (continued):

Significant cash commitments in years subsequent to March 31, 2011 are as follows:

	1 year	2 years	3 years	Total
Accounts payable and accrued liabilities	\$ 1,032,458	\$ -	\$ -	\$1,032,458
Due to related party	229,540	-	-	229,540
Lease obligation	667,132	216,443	-	883,575
Credit facility	-	-	-	-

13. Capital disclosure:

The Company's objectives when managing capital are:

- To maintain its ability to continue as a going concern.
- To provide adequate working capital.
- To maintain cash on hand in highly liquid and highly rated financial instruments.
- Meet the debt covenants imposed by the Company's banking institution.

The Company includes the following items in the management of capital; cash, cash equivalents, credit facility and shareholders' equity comprised of issued capital, contributed surplus and deficit. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions. The company may adjust its capital structure in the future, by issuing shares and adjusting debt utilization. As at March 31, 2011, the Company's capital is as follows:

	2011	2010
Credit facility	\$ -	\$ 500,000
Cash	837,416	(13,893)
Net debt	837,416	486,107
Shareholders' equity	4,980,142	2,565,969
	\$ 5,817,558	\$ 3,052,076

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

13. Capital disclosure (continue):

The Company is subject to the following capital requirements relating to the covenants and conditions of its bank line of credit:

- The working capital ratio shall not be less than 1.1:1.
- The debt to tangible net worth ratio shall not at any time exceed 2.75:1.
- There will be no dividends, reduction in loans from shareholders, subsidiaries or related parties, or other withdrawals of similar nature without the prior consent of the bank.
- The bank reserves the right to require foreign receivables to be insured by the EDC with direction by the Company to pay all insurance proceeds to the bank.

The Company was in compliance with the above noted covenants as at December 31, 2010, and for the three months ended March 31, 2011.

14. Bank credit facility and restricted cash:

In November 2007, the Company secured a bank operating line credit facility of up to \$500,000 under the Export Development Canada's Master Accounts Receivable Guarantee (MARG) program. This credit facility is secured by a cash deposit of \$50,000 plus interest earned thereon, a general security agreement, a general assignment of book debts and a \$450,000 MARG program with Export Development Canada and assignment of all risk insurance coverage. This facility bears interest at the bank's prime plus 1.25% per annum. The Company also obtained a corporate credit card in June 2007. The credit card is secured by a \$51,750 cash deposit. The deposit earns interest at prime minus 2.35%. The facility is subject to periodic review by the bank not less frequently than annually. All amounts outstanding under the credit facility are due on demand.

PHOTON CONTROL INC.

Notes to Consolidated Financial Statements

For the three months ended March 31, 2011 and 2010

15. Segmented information:

Photon Control Inc. commercializes and develops innovative measurement technologies specializing in Oil & Gas, Semiconductor, Power, Life Sciences and Manufacturing industries worldwide. Photon Control's products have competitive advantages in both performance and cost. Photon Control's approach to creating shareholder value has been to pursue Original Equipment Manufacturer (OEM) sales whether directly or through a distributor and to investigate the market potential of products by working directly with customers in select industries to foresee their sectors' requirements. These collaborations often include commitments to conduct trials of the new products on industrial sites.

(a) Geographic information:

Information regarding revenue earned from major customers by geographic segments, based on the location of the customer, is as follows:

	2011	2010
Revenue:		
Canada	\$ 108,781	\$ 107,338
United States	2,362,007	2,668,578
Europe	5,698	65,888
Taiwan	4,456	4,423
China	540,317	500,643
Russia	10,550	74,116
Other	218,494	37,529
	<u>\$ 3,250,303</u>	<u>\$ 3,582,897</u>

All of the Company's equipment and intangible assets are located in Canada.

(b) Major customers:

The following table identifies the percentage of revenue generated from individual customers comprising 10% or more of the Company's revenue:

	2011	2010
Entity A	40%	28%
Entity B	17%	19%
Entity C	10%	16%
Entity D	9%	14%
	<u>76%</u>	<u>77%</u>
