

PHOTON CONTROL INC. CONFLICT MINERALS POLICY STATEMENT

As of June 14, 2021

Photon Control is committed to the responsible sourcing of materials used in our products.

The conflict minerals regulation in the United States (Section 1502 of the Dodd-Frank Wall Street Reform and the Consumer Protection Act) requires companies who report to the Security and Exchange Commission (SEC) to review their products and determine whether tin, tungsten, tantalum and gold (“conflict minerals”) are necessary for production. If necessary for production, companies are required to evaluate their supply chain and declare whether conflict minerals originate in and around the Democratic Republic of the Congo from sources that finance civil rights abuses.

While Photon Control Inc. is not a publicly traded company subject to SEC reporting, Photon Control fully supports the responsible sourcing of conflict minerals throughout our supply chain, and will act responsibly to ensure that our products meet the needs of our customers and support the aim of this Act.

Suppliers and other external parties are also encouraged to contact us at legal@photoncontrol.com if they wish to seek guidance on this policy or if they wish to report concerns.
